50 Year Anniversary

Our Forest Management Program for landowners and hunting clubs is celebrating 50 years of service this year! In early 1956, company foresters began writing and implementing sustainable forest management plans for area hunting clubs.

Successful harvesting programs on these properties are evident today with healthier and more valuable forests. And since Aspen is ready to harvest in 35-40 years, the same forests that were harvested back then are ready to be logged again. **This is really Sustainable Forestry At Work!**
